

ASHOK B

MERN Stack Developer | GraphicDesigner| ProcessExecutive

Contact:+919597908175 | Email:ashokbala1212@gmail.com | Github: <https://github.com/Ashokbala1627>
| Location:Boyampalayam,Tiruppur.

Objective:

Versatile professional with a proven track record in graphic design and process management, now transitioning to a career as a MERN stack developer. Equipped with a strong foundation in both creative design and efficient workflow optimization, I am committed to leveraging my diverse skill set to excel in web development. Seeking opportunities to apply my adaptability, problem-solving abilities, and passion for innovation to contribute to dynamic projects and drive organizational success.

Skills:

- **MERN Stack Development** : MongoDB , Express.js, React.js, Node.js.
- **Graphic Design**: Adobe Illustrator, Adobe Photoshop, CorelDRAW.
- **Front-End Web Development**: HTML, CSS, Bootstrap, JavaScript .
- **Deployment** : One month internship project deployed in backend in Cyclic, frondend in Vercel.
- **Process Management**: Document processing, Quality control, Training, Process improvement.
- **Responsive Design**: Cross-browser compatibility.
- **MySQL** : Basic knowledge in Structured query language [access, manipulate and store data\(CRUD\)](#).
- **Office Suite**: MS Office.

Education:

- MERN- Full Stack Developer program, Edureka Learning Center, Coimbatore (Jan 2024 - Feb 2024)
One-Month Internship with Hands-On Project.
- Graphic Designer, Fortune Innovatives, Tiruppur (2022).
- B.Sc. in Computer Science, Nandha Arts and Science College| Bharathiyar University(2015 -2018).
- Higher Secondary Certificate (HSC),Nanjappa BoysHigherSecondarySchool| StateBoard,72%(2015).
- Secondary School Leaving Certificate(SSLC),Nanjappa Boys HigherSecondarySchool| StateBoard,78%(2013).

Experience:

MERN Stack Developer(Fresher)

- Edureka Internship Project by using React.Js: <https://eat-tasty-frontend.vercel.app/>

Graphic Designer , I-Smart Solution(2018-2019)and(2022-2023)

- Designed engaging marketing materials, including brochures, posters, and digital advertisements.
- Ensured brand consistency and adherence to corporate design guidelines.
- Successfully managed multiple design projects with tight deadlines.
- Conductedin-depth market research and competitor analysis to inform design decisions and enhance marketing strategies.

Process Executive, Cognizant Technology Solutions(2020-2021)

- Processed State taxlien, County taxlien, and Federal taxlien documents.
- Conducted APN research based on property documents, ensuring accuracy.
- Collaborated with the team to improve quality checks and scores.

- Implemented process improvements, leading to a 15% reduction in processing time.
- Trained new team members on document processing procedures and quality standards.
- Recognized for consistently meeting or exceeding productivity and accuracy targets.

Projects:

Zomato inspired project using MERN Technology

- Creating a project like Zomato involves various components, including frontend development, backend development, database management, user authentication, and more. While I can't create the entire project for you here, I can provide an outline of the key features and components you might include:

Frontend Development:

- Design a user-friendly interface for customers to browse restaurants, view menus, and place orders.
- Implement a responsive design to ensure compatibility across various devices. Include features like search, filters, and sorting options for easy navigation.
- Develop pages for user registration, login, and profile management.

Backend Development:

- Set up a server using Node.js and Express.js to handle HTTP requests and responses.
- Implement RESTful APIs to handle CRUD (Create, Read, Update, Delete) operations for restaurants, menus, orders, etc. Integrate middleware for request validation, error handling, and authentication. Use MongoDB or a similar database to store and manage restaurant data, user information, and orders.
- Authentication and Authorization: Implement user authentication using JWT (JSON Web Tokens) or OAuth for secure access to the application. Set up role-based access control to restrict certain features or actions based on user roles (e.g., customer login, Signup).

Github Links:

Responsive Website: Created using HTML , CSS, and Bootstrap:
